THE VALUE OF INNOVATION

# FLEX LSMT

**A FLEXIBLE WAY IN LIGHTING**

# FLEX SMT

A FLEXIBLE WAY IN LIGHTING

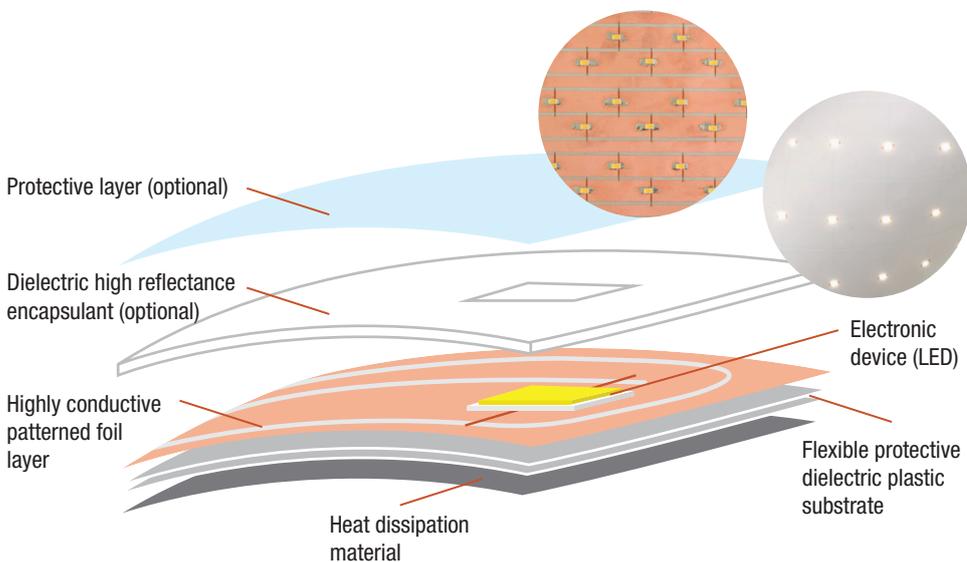

## THE CONCEPT

Thanks to an innovative technology we are able to create soft flexible large area panel with embedded electronic devices like LEDs to be used as display, lighting source, panels, design, ...

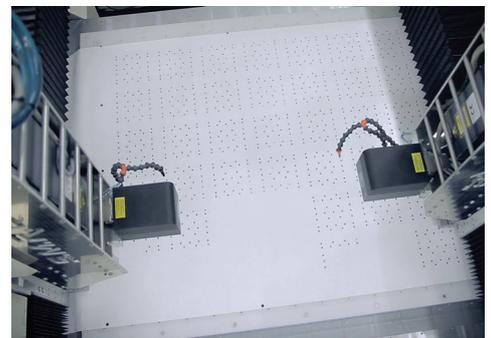

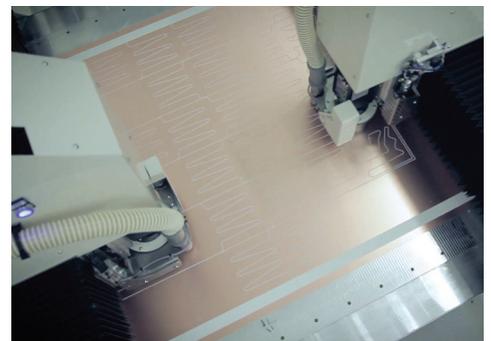

## STRUCTURE

A multilayer structure can be easily used as a support easy to be mounted electronic devices ensuring at the same time high processability, performances, integration in flexible, light, thin assembly

## PRODUCTION

## APPLICATION

Extra thin + flexible + eco = excellent flex solution

is a young and dynamic **engineering company**  
founded in 2008. We focus on services related to **mechanical**  
and **electrical engineering** within the lighting field.

## Where can you find us?
